<td>12:30 p.m. – 12:35 p.m.</td>
<td>Welcome and Introduction</td>
<td>Angelo E. Gousse, MD</td>
</tr>
<tr>
<td>12:35 p.m. – 1:00 p.m.</td>
<td>State-of-the-Art Lecture: The Effect of Radiation Treatment on the Lower Urinary Tract</td>
<td>O. Lenaine Westney, MD</td>
</tr>
<tr>
<td>1:00 p.m. – 1:20 p.m.</td>
<td>General Principles in Radiation Fistula Reconstruction</td>
<td>Kenneth W. Angermeier, MD</td>
</tr>
<tr>
<td>1:20 p.m. – 1:40 p.m.</td>
<td>Discussion and Questions</td>
<td></td>
</tr>
<tr>
<td>1:40 p.m. – 2:50 p.m.</td>
<td>EVALUATION AND MANAGEMENT OF URINARY INCONTINENCE IN FEMALE PATIENTS AFTER RADIATION</td>
<td></td>
</tr>
<tr>
<td>2:00 p.m.</td>
<td>Transvaginal Repair of Vesico-Vaginal Fistula</td>
<td>Victor W. Nitti, MD</td>
</tr>
<tr>
<td>2:20 p.m.</td>
<td>Transabdominal Repair of Vesico-Vaginal Fistula</td>
<td>E. Ann Gormley, MD</td>
</tr>
<tr>
<td>2:40 p.m.</td>
<td>Urinary Diversion for Complex Vesico-Vaginal Fistula</td>
<td>Andrew C. Peterson, MD</td>
</tr>
<tr>
<td>2:50 p.m. – 3:20 p.m.</td>
<td>VOIDING DYSFUNCTION AFTER CANCER TREATMENT</td>
<td>Moderators: Timothy B. Boone, MD, PhD</td>
</tr>
<tr>
<td>3:20 p.m. – 4:30 p.m.</td>
<td>SURGICAL MANAGEMENT OF THE MALE PATIENT AFTER PROSTATE CANCER TREATMENT COMPLICATIONS: WITH OR WITHOUT RADIATION</td>
<td>Moderators: H. Henry Lai, MD, Daniel S. Elliott, MD</td>
</tr>
<tr>
<td>3:00 p.m.</td>
<td>Urodynamic Findings in Radiated Patients</td>
<td>Timothy B. Boone, MD</td>
</tr>
<tr>
<td>3:10 p.m.</td>
<td>Overactive Bladder after Radiation</td>
<td>Alan J. Wein, MD, FACS, PhD (Hon)</td>
</tr>

EDUCATIONAL NEEDS AND OBJECTIVES

Educational Needs: Many urologists lack knowledge of the pathophysiologic basis and prevalence of voiding dysfunction after cancer treatment in male and female patients. There is a lack of emphasis during residency training and in the urologic literature on voiding dysfunction and cancer survivorship. Consequently, many practicing urologists have a poor understanding of how radiation, chemotherapy or cancer surgery can lead to voiding dysfunction. Because of this knowledge gap, many affected patients are not identified and remain untreated. The program will promote a better understanding of various voiding dysfunctions which can develop after urologic and non-urologic cancer treatment. The program will discuss the effects of radiation, chemotherapy and cancer surgery on male and female lower urinary tract function. State of the art management options will be offered by expert panelists to achieve optimal results.

Educational Objectives: At the conclusion of the meeting attendees should be able to:
1. Describe the effect of radiation and chemotherapy on the lower urinary tract.
2. Evaluate the lower urinary tract after radiation and chemotherapy. Failure to store and failure to empty voiding dysfunctions will be identified.
3. Explain the pros and cons of various surgical approaches in the management of male and female urinary incontinence after cancer treatment.
4. Describe the emerging role of voiding dysfunction and cancer survivorship in urology practice as well as the effects on quality of life and need for long-term follow up.

CME Accreditation

Accreditation: The American Urological Association (AUA) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit Designation: The American Urological Association designates this live activity for a maximum of 4.0 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Evidence Based Content: It is the policy of the AUA to ensure that the content contained in this CME activity is valid, fair, balanced, scientifically rigorous, and free of commercial bias.

AUA Disclosure Policy: All persons in a position to control the content of an educational activity (i.e., activity planners, presenters, authors) participating in an educational activity provided by the AUA are required to disclose to the provider any relevant financial relationships with any commercial interest. The AUA must determine if the individual’s relationships may influence the educational content and resolve any conflicts of interest prior to the commencement of the educational activity. The intent of this disclosure is not to prevent individuals with relevant financial relationships from participating, but rather to provide learners information with which they can make their own judgments.

Resolution of Identified Conflict of Interest: All disclosures will be reviewed by the program/course directors or editors for identification of conflicts of interest. Peer reviewers, working with the program directors and/or editors, will document the mechanism(s) for management and resolution of the conflict of interest and final approval of the activity will be documented prior to implementation. Any of the mechanisms below can/will be used to resolve conflict of interest:
1. Peer review for valid, evidence-based content of all materials associated with an educational activity by the course/program director, editor, and/or Education Content Review Committee or its subgroup.
2. Limit content to evidence with no recommendations
3. Introduction of a debate format with an unbiased moderator (point-counterpoint)
4. Inclusion of moderated panel discussion
5. Publication of a parallel or rebuttal article for an article that is felt to be biased
6. Limit equipment representatives to providing logistics and operation support only in procedural demonstrations
7. Divestiture of the relationship by faculty

Off-label or Unapproved Use of Drugs or Devices: It is the policy of the AUA to require the disclosure of all references to off-label or unapproved uses of drugs or devices prior to the presentation of educational content. The audience is advised that this continuing medical education activity may contain reference(s) to off-label or unapproved uses of drugs or devices. Please consult the prescribing information for full disclosure of approved uses.

Disclaimer: The opinions and recommendations expressed by faculty, authors and other experts whose input is included in this program are their own and do not necessarily represent the viewpoint of the AUA.

Audio, Video and Photographic Equipment: The use of audio, video and other photographic recording equipment by attendees is prohibited inside AUA meeting rooms.

Reproduction Permission: Reproduction of written materials developed for this AUA course is prohibited without the written permission from individual authors and the American Urological Association.

Special Assistance/Dietary Needs: The American Urological Association complies with the Americans with Disabilities Act §12112(a). If any participant is in need of special assistance or has any dietary restrictions, please see the registration desk.
